

```
1 ---
2 title: "Untitled"
3 author: "Andrew Zieffler"
4 date: "1/5/2018"
5 output: html_document
6 ---
7
8 ```{r setup, include=FALSE}
9 knitr::opts_chunk$set(echo = TRUE)
10 ```
11
12 ## R Markdown
13
14 This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF,
15 and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.
16
17 When you click the Knit button a document will be generated that includes both content as
18 well as the output of any embedded R code chunks within the document. You can embed an R code
19 chunk like this:
20
21 ```{r cars}
22 summary(cars)
23 ```
24
25 ## Including Plots
26
27 You can also embed plots, for example:
28
29 ```{r pressure, echo=FALSE}
30 plot(pressure)
31 ```
```

This will open a document that has some pre-included text and is formatted using Markdown.

Save this document (File > Save) on your computer. Then click the **Knit** button.

Knitting compiles the document and formats it according to the markdown you included (or that was pre-included for you).

The actual file you saved has the **.Rmd** extension. The compiled, formatted document has the extension **.html**. The HTML file can be opened in any browser.
